

NIKHIL E

React.js Developer | Frontend Engineer | JavaScript & TypeScript Specialist

Greater Kuala Lumpur, Malaysia · +60 14 262 8045 · nikhilerukala99@gmail.com · LinkedIn · Portfolio

PROFESSIONAL SUMMARY

React.js Developer with 3+ years building production-grade web applications across healthcare, e-commerce, and BFSI domains. Expert in the React.js ecosystem including Hooks, component lifecycle, state management, and performance optimization. Strong foundation in JavaScript (ES6+), TypeScript, and modern frontend frameworks with hands-on experience integrating RESTful APIs, AI APIs (OpenAI, Claude), and collaborative Git workflows. Proven track record delivering scalable, responsive applications using Material UI, Tailwind CSS, and component-driven architecture.

TECHNICAL SKILLS

Core Technologies: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3

React Expertise: React Hooks, Component Lifecycle, State Management (Redux, Zustand, Context API), Performance Optimization

UI Frameworks: Material UI, Ant Design, Tailwind CSS, shadcn/ui, Bootstrap, Responsive Design

Frontend Tools: Next.js, React Query, Vite, Webpack, Git, GitHub, GitLab, RESTful API Integration

Backend & APIs: Node.js, Express.js, REST APIs, GraphQL (basic), OAuth, JWT, RBAC

Databases: PostgreSQL, MySQL, MongoDB, Prisma ORM

AI & Dev Tools: OpenAI API, Claude API, Claude Code, Anthropic SDK

Practices: Component Architecture, SPA Development, Agile/Scrum, Cross-browser Compatibility, Frontend Performance Optimization

PROFESSIONAL EXPERIENCE

Frontend Developer

December 2025 – Present

CREATIVE MOBILE MULTIMEDIA BROADCASTING (CMMB) SDN. BHD

Kuala Lumpur, Malaysia

- Built a full-stack **Warehouse Management System (SmartStock)** using **React 18, Node.js, Express, and PostgreSQL**, featuring real-time inventory tracking, order fulfillment pipelines, and AI-powered demand forecasting via the **OpenAI GPT-4 API**.
- Designed and optimised **8+ relational SQL schemas** with **Prisma ORM**, including normalised tables for SKUs, stock movements (append-only audit log), warehouses, and orders, reducing query latency by **~40%** through composite indexes and query batching.
- Integrated **Anthropic Claude API** to build an AI-assisted demand forecast feature; ingested 90-day stock movement data and generated plain-English restock recommendations with **streamed responses using Server-Sent Events (SSE)**.
- Developed a **natural language alert configuration** feature using Claude API structured JSON output, allowing managers to define inventory rules in plain English with parsed intent persisted as structured rule objects to PostgreSQL.
- Implemented **role-based access control (RBAC)** with JWT authentication, gating Staff, Manager, and Admin views across **12+ protected API routes** enforced at middleware level.
- Built reusable **React component library** with shadcn/ui and Tailwind CSS including server-side paginated data tables, drag-and-drop Kanban order board, and live inventory status widgets consumed across 5+ pages.
- Accelerated development with **Claude Code** for Prisma schema scaffolding, Express route boilerplate, and unit test generation, reducing repetitive boilerplate time by an estimated **30%** while maintaining full code review and ownership.

React.js Developer

May 2024 – November 2025

NEXTENTI TECH PRIVATE LIMITED

Hyderabad, India

- Led frontend development of healthcare recruitment SaaS platform using React.js, JavaScript (ES6+), and TypeScript, serving **5,000+ doctors** and **200+ hospitals** with **15,000+ monthly active sessions**.
- Architected component-based React application utilising Hooks (useState, useEffect, useContext, useMemo, useCallback) and lifecycle methods to manage complex state across **4 user roles** with OAuth authentication and granular RBAC.
- Integrated RESTful APIs for real-time job matching, profile management, and application tracking, implementing error handling, loading states, and optimistic UI updates for seamless user experience.
- Optimised React performance for large datasets (**10K+ job listings**) through virtualisation, memoisation, code-splitting, and lazy loading, reducing initial render time from **3.2s to 800ms** and improving Lighthouse scores to **92+**.
- Developed reusable component library (**40+ components**) following atomic design principles with TypeScript interfaces and unit tests, reducing feature development time by **50%**.
- Integrated **OpenAI GPT-4 API** to build intelligent job matching engine with RESTful endpoints, reducing average time-to-hire by **35%** through automated candidate-job matching algorithms.
- Collaborated with backend team using Git workflows (feature branching, pull requests, code reviews) and participated in daily standups, sprint planning, and retrospectives in Agile environment.

React.js Developer

June 2022 – April 2024

Kwikcoder-IT Solution India

- Developed full-stack School Management System using React.js (Hooks, Context API), Next.js, and TypeScript with PostgreSQL backend, managing **2,500+** **student records** across attendance, admissions, fee tracking, and staff modules.
- Implemented React component architecture with functional components, custom Hooks, and Higher-Order Components (HOCs), improving code reusability by **60%**.
- Optimised frontend performance through code-splitting, lazy loading, React.memo, useMemo, and useCallback hooks, reducing bundle size by **40%** and improving page load time from **4.2s to 1.8s**.
- Built state management solution using React Context API and useReducer for complex form handling, multi-step workflows, and real-time data synchronisation across dashboard modules.
- Managed version control with Git following GitFlow branching strategy; conducted peer code reviews across a cross-functional team of 5 developers on 2-week Agile sprint cycles.

CERTIFICATIONS

Introduction to Generative AI Ministry of Digital Malaysia & Intel Digital Readiness Program	January 2026
React JS, JavaScript Essentials, Responsive Web Design NxtWave CCBP 4.0	
Digital Marketing Certification NxtWave / Online	

EDUCATION

NxtWave CCBP 4.0 Intensive Program	June 2022 – February 2023
<i>Fellow – Full Stack Development</i>	<i>Online</i>
Vardhaman College of Engineering (VCEH)	2019 – 2022
<i>Bachelor of Technology</i>	<i>Hyderabad, India</i>
