

NIKHIL E

Frontend Engineer | React & Next.js Developer | LLM Feature Integration

Hyderabad, India (Open to Relocation) | Immediate Joiner
+91 9381378437 | nekkhel45@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

React.js Developer with 4 years of experience building scalable, high-performing web applications across healthcare, education, and enterprise domains. Proven expertise in React component architecture, performance optimisation, and cross-functional team collaboration. Experienced in Next.js (SSR/SSG), Node.js, TypeScript, and modern UI frameworks. Hands-on with AI integration in UI (chatbots, recommendation engines), prompt engineering for LLMs, and secure application development (CORS, JWT-based authentication, RBAC). Adept at code reviews, mentoring junior developers, and delivering production-grade solutions in Agile environments.

TECHNICAL SKILLS

Core: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3

React Ecosystem: React Hooks, Component Lifecycle, Redux, Zustand, Context API, React Query, Performance Optimisation (memoisation, virtualisation, code-splitting, lazy loading)

Frameworks & UI: Next.js (SSR, SSG, API Routes, Routing), Material UI, Ant Design, Tailwind CSS, shadcn/ui, Bootstrap, Responsive / Accessible Design (a11y, axe-core)

Backend & APIs: Node.js, Express.js, REST APIs, GraphQL (basic), OAuth, JWT, RBAC, Server-Sent Events (SSE)

Databases & ORM: PostgreSQL, MySQL, MongoDB, Prisma ORM

Build & Tooling: Vite, Webpack, Git, GitHub, GitLab, Monorepo (Nx / Turborepo basics)

AI & LLM: OpenAI API (GPT-4), Anthropic Claude API, Claude Code, Prompt Engineering for LLMs, AI-powered UI (chatbots, recommendation engines)

Security: CORS mitigation, JWT-based Auth, Middleware-enforced RBAC

Practices: Agile/Scrum, Code Reviews, Mentoring, Cross-browser Compatibility, Atomic Design

PROFESSIONAL EXPERIENCE

Frontend Developer

Creative Mobile Multimedia Broadcasting (CMMB) Sdn. Bhd.

July 2025 – June 2026

Kuala Lumpur, Malaysia

- Built a full-stack **Warehouse Management System (SmartStock)** using **React 18**, **Node.js**, **Express**, and **PostgreSQL**, featuring real-time inventory tracking, order fulfilment pipelines, and AI-powered demand forecasting via the **OpenAI GPT-4 API**.
- Developed reusable React component library with **shadcn/ui** and **Tailwind CSS** — including server-side paginated data tables, drag-and-drop Kanban order board, and live inventory widgets — consumed across 5+ pages; enforced **accessibility (a11y)** standards throughout.
- Integrated **Anthropic Claude API** to build an AI-assisted demand forecast feature; ingested 90-day stock movement data and generated plain-English restock recommendations with streamed responses using **Server-Sent Events (SSE)** — demonstrating practical **prompt engineering for LLMs**.
- Implemented **JWT authentication** with **role-based access control (RBAC)**, securing 12+ protected API routes across Staff, Manager, and Admin roles at middleware level — applying **CORS** mitigation and secure authentication best practices.
- Designed and optimised 8+ **relational SQL schemas** with **Prisma ORM**, including normalised tables for SKUs, stock movements, and orders; reduced query latency by ~**40%** through composite indexes and query batching.
- Conducted **code reviews**, maintained coding standards, and accelerated development with **Claude Code** for Prisma schema scaffolding and Express route boilerplate, reducing repetitive work by an estimated **30%**.

React.js Developer

Nextenti Tech Private Limited

May 2024 – June 2025

Hyderabad, India

- Led frontend development of a **healthcare recruitment SaaS platform** using **React.js**, **TypeScript**, and **JavaScript (ES6+)**, serving **5,000+ doctors** and **200+ hospitals** with 15,000+ monthly active sessions.
- Architected a **component-based React application** using Hooks (useState, useEffect, useMemo, useCallback) and **Context API**, managing complex state across 4 user roles with **OAuth** and granular RBAC.
- Optimised React performance for **10K+ job listings** via **virtualisation**, **memoisation**, **code-splitting**, and **lazy loading**, cutting initial render time from 3.2 s to **800 ms** and raising Lighthouse scores to **92+**.
- Built and maintained **40+ reusable components** following **atomic design** principles with TypeScript interfaces and unit tests, reducing feature development time by **50%**.
- Integrated **OpenAI GPT-4 API** to build an intelligent **AI-powered job-matching recommendation engine**, cutting average time-to-hire by **35%** through automated candidate-job matching.

- Mentored junior developers through **code reviews**, pair programming, and knowledge-sharing sessions; participated in daily stand-ups, sprint planning, and retrospectives in an **Agile/Scrum** environment.
- Integrated **RESTful APIs** for real-time job matching, profile management, and application tracking, implementing error handling, loading states, and optimistic UI updates.

React.js Developer

June 2022 – April 2024

Kwikcoder-IT Solutions

India

- Developed a full-stack **School Management System** using **React.js**, **Next.js (SSR/SSG, API routes, routing)**, and **TypeScript** with a **PostgreSQL** backend, managing **2,500+ student records** across attendance, admissions, fee tracking, and staff modules.
- Implemented React architecture with functional components, **custom Hooks**, **Higher-Order Components (HOCs)**, and **Context API + useReducer** for complex state management, improving code reusability by **60%**.
- Optimised bundle performance via **code-splitting**, **lazy loading**, **React.memo**, **useMemo**, and **useCallback**, reducing bundle size by **40%** and page load time from **4.2 s** to **1.8 s**.
- Managed version control with **Git (GitFlow)** and conducted peer **code reviews** across a cross-functional team of 5 developers on 2-week **Agile** sprint cycles.

EDUCATION

NxtWave CCBP 4.0 Intensive Program

June 2022 – February 2023

Fellow – Full Stack Development

Online

Vardhaman College of Engineering (VCEH)

2019 – 2022

Bachelor of Technology

Hyderabad, India

CERTIFICATIONS

Introduction to Generative AI – Ministry of Digital Malaysia & Intel Digital Readiness Program

Jan 2026

React JS, JavaScript Essentials, Responsive Web Design – NxtWave CCBP 4.0

Digital Marketing Certification – NxtWave
